

PHY 275 Classical Mech pop quiz #1

- 1) You can watch the lecture section to derive equation (1.36) on:

<https://youtu.be/i4HjW4QKMbw?list=PLb169AflJA0EI-WsA20boHK1OlCmsFrSn&t=5813>

Can you derive this equation of motion on your own? (up to equation 1.36, not the solving part).

- 2) Can you derive the equation of motion of equation (1.51)?

When assume small angle approximation equation (1.52), can you turn the 2nd order equation (1.53) into systems of 1st order equations in matrix form?
